OBJECTIVE

A motivated and detail-oriented Frontend Developer with strong technical skills in building responsive, user-friendly, and efficient web applications. Passionate about solving real-world problems through clean and efficient code, and eager to apply my knowledge in a collaborative environment that encourages learning, innovation, and continuous professional growth.

TECHNICAL SKILLS

LANGUAGES: HTML, CSS, JAVASCRIPT, C++, TYPESCRIPT

FRAMEWORKS & LIBRARIES: REACT.JS, NEXT.JS, FRAMER-MOTION, CHART.JS

STYLING: CSS, SCSS, BOOSTRATP, TAILWINDCSS

BACKEND/SERVICES: FIREBASE(DATABASE)

TOOLS: GITHUB, VSCODE, GIT

RESPONSIVE DESIGN: FLEXBOX, CSS GRID, MOBILE-FIRST DESIGN

EXPERIENCE

INTERN, DUFIL PRIMA FOODS LTD

Mar 2026 - Present

Assisted in system configuration, troubleshooting and management of user access and license data within the MIS department. Supported data validation processes, improved data accuracy, and contributed to frontend skill development and debugging practice.

EDUCATION

LAGOS STATE UNIVERSITY (2023 – 2027)

Bachelor's Degree in Computer Science

PROJECTS

BUDGET TRACKER WEB APPLICATION [SCSS, REACT.JS]

A personal web application designed to help users manage their income and expenses efficiently. Users can add, delete and track financial transactions. The project is focused on improving financial management through a clean user friendly interface

GENJO TEACHER [TAILWINDCSS, REACT.JS, TYPESCRIPT, FRAMER-MOTION]

A currently ongoing project that I being built with a backend developer for user with various background to learn Igbo with ease and at their own pace

BIBLE STUDY QUESTION & ANSWER WEBAPP [NEXT.JS, FIREBASE(DATABASE)]

A full-stack web platform that allows users to submit and view Bible-related questions. Admins can respond to questions and manage content.

FRONTEND MENTOR-PRODUCT LISTING WITH CART CHALLENGE [HTML, CSS, JAVASCRIPT]

A functional shopping cart application with add/ remove item functionality and real-time calculation. Fully responsive design

HEALTH SHEILD AI [SCSS, REACT.JS, FRAMER-MOTION]

A multi-platform health assistant application that leverages AI and machine learning to provide health-related services, including chat, symptom assessment, and predictions. This project was with me handling the user interface and a backend developer who handled the server-side logic.

COMMUNICATION

I communicate ideas clearly and effectively, both in writing and verbally. I am comfortable explaining technical concepts, asking questions, and collaborating with others to achieve common goals.
